

THLCD01A

LCD INFRARED THERMOMETER

Contactless digital infrared thermometer, for reliable temperature measurement. It is highly accurate and easy to use in any scenarios such as stations, airports, offices, worksites, shops and schools. Temperature measurement offers a margin of $\pm 0.2^\circ$ and an instant audible alert sounds if the set threshold is exceeded.

Contactless temperature measurement

Ultra-high accuracy

Temperature measured in 1 second

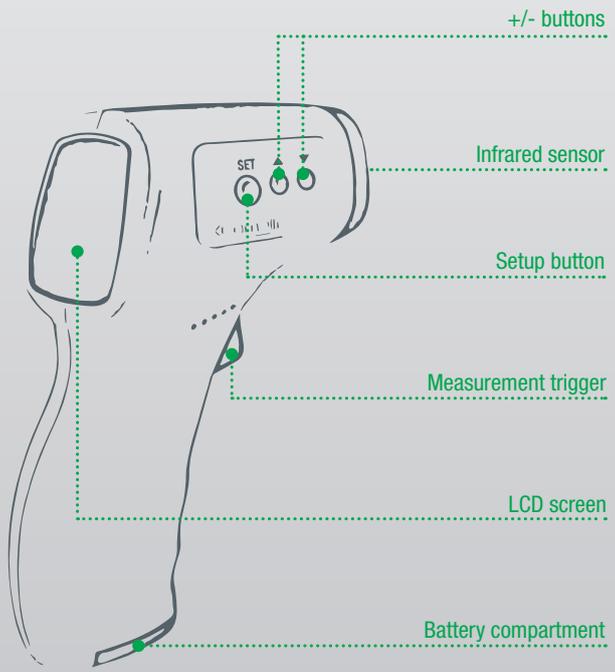

Audible alert if threshold exceeded

THLCD01A

Name	LCD infrared thermometer
Measuring method	Contactless
Measuring distance	3-5 cm
Error margin	±0.2°C
Unit of Measurement	Celsius and Fahrenheit
Shield	LCD
Power supply	2 x AAA batteries
Weight	172 g
Dimensions	149*77*43 mm
Operating temperature	10-40°C
Humidity	≤ 85%
Measurement time	≤ 1 second
Auto Switch-off	After 30 seconds of inactivity
Alarm indication	Audible tone
Measurement applications	Any surface, Room/Environment

USAGE SCENARIOS

An instrument suited to all scenarios, from high-flow areas such as airports or shopping centres to medium and low-flow settings such as company sites, offices and shops and industrial scenarios for the measurement of the temperature of any surface or ambients. No M.D.
