Contents

Overview of System

Please read this entire manual before attempting to install this system.
This system should only be installed by a professional automatic gate installer or access control specialist dealer.
It is recommended that the system be set up, configured, commissioned and tested on a workshop bench *before* taken to site for installation.

Site Survey

Before installing this system, you need to be sure that there is good mobile GSM cell coverage in the area it is to be installed. It is recommended that you conduct a site survey, and check reception on the site for a GSM network. If reception is poor in the area, then this system is not recommended.

SIM Card

You will need a SIM card in order to use this system. It should be a regular voice and SMS text SIM card and capable of running on 2G service. Do not use a data only SIM, as this is only for tablets and will not work in the unit.
1) Ensure the SIM has calling credit, and can make and receive calls on a mobile cell phone.
2) Check that the SIM is not locked to a phone and can be used in other devices.
3) Check that the SIM does not have a PIN code request.
4) Disable voicemail service on the SIM.
5) You are now ready to begin programming.

Power

TIP: Most technical calls received are due to installers using CAT5 or alarm cable to power the unit. Neither are rated to carry enough power (2 amp peak). Please use following cable…

Up to 2 metres (6 feet) – Use minimum 0.5mm^2 (18 gauge)
Up to 4 metres (12 feet) – Use minimum 0.75mm^2 (16 gauge)
Up to 8 metres (24 feet) – Use minimum 1mm^2 (14 gauge)
WARNING
Warranty VOID if power cable requirements are not followed!

Using insufficient power cable thickness will cause excessive stress on electronic components, and therefore void the manufacturer's warranty.
To avoid such problems, it is recommended (and is good practice) to locate the power supply as close to the transmitter as possible. This avoids power cable noise and interference and enhances the lifetime of the product.

Tip: Use appropriate fixings to ensure the intercom cannot be removed from the wall.

Inserting the SIM card
Please ensure the SIM card is a Nano SIM card. Do not use a SIM card for a tablet, as these only support data, and do not support voice and SMS. You simply require a mobile phone type SIM card.

TIPS:

My GSM LED is still searching…

-Check the SIM card is registered and can make a call in a phone.

-Check the SIM card is seated correctly. Power off, clean the contacts on the SIM and the GSM unit, and reinsert the SIM.

-Check power cable distance and thickness.

-Increase antenna height.

-Change network.

-Move antenna away from metal objects & shrubs.

-Fit a high gain antenna.

Installing the Programmer APP for the first time

1. For android or apple devices you can download the AES programming app called "Cellcom Prime Programmer" (or scan QR code below).
2. Open the app and allow all permissions (Android users).
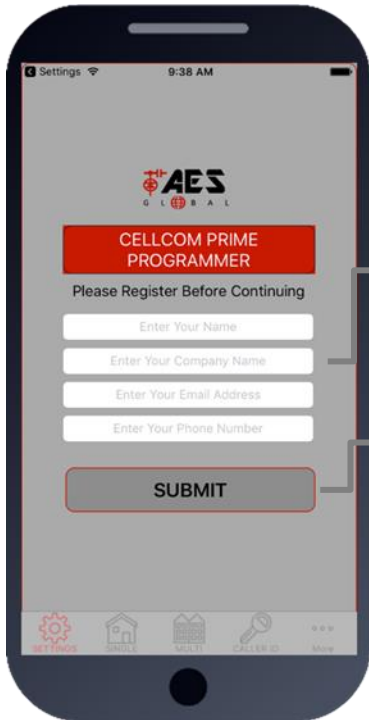

Register your details first time for support registration.

Press Submit and send your details via email client.

SETTINGS SINGLE MULTI CALLER ID More

1.Go to MORE>CLIENT LIST to reveal the screen shown.

2.Press and HOLD to select the desired client.

3.Iphone users press the info symbol. Android users **press and hold** the client, and then press upload to begin programming.

Now you are ready to begin programming!

Programming

Now that you have either entered a new client, or selected an existing client from the client list, you are now ready to begin programming.
Step 1: Check Reception

Go to MORE>INFO & press the reception check button.
On Android the app will automatically send a SMS string (*20#) to the intercom.
On iphone, users will be taken to their SMS screen to confirm before sending the string. The intercom should then reply with a signal level between 1 and 31.

1-12	13-20	21-31
Poor	Medium	Good
For good performance, signal level on 2G should be at least 13. On 3G products it should be no less than 10.

TIP: If signal is lower than recommended, then take IMMEDIATE action. Change network if possible, or use an optional high gain antenna. Check power cable is within recommended specification. (Poor power cable can lower reception).

Note: SMS string= *20#

*20#

SMS message sent to intercom.

Signal Level = 19

SMS reply to your phone.
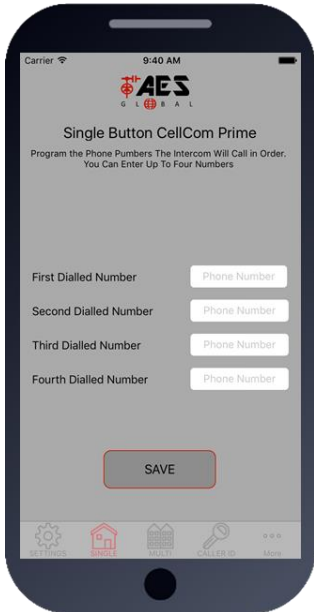

Step2: Programming Numbers for the intercom to call on button press.

1.Press the SINGLE home icon for a 1 button system, or MULTI for a 10 button system.
2. Simply enter cell phone numbers and/or landline phones which the intercom is to call when the call button is pressed. (10 button model please enter button number).
3. Press SAVE. Note: iphone users will be taken to their SMS screen to confirm the SMS string (press send).
4. The intercom should reply with an SMS to your phone showing the SMS string and an OK status.

SMS Programming Format:

9999#111telephonenumber#

Pass code

Function code
(add number)

Button number
(1-10)

Telephone number
position 1-4

Data
E.g. 9999#**111**firstnumber#**112**secondnumber#**113**thirdnumber#

Programming dial out numbers for multi button versions
Please note the position of the buttons on the above panel options. For example, if you have a 2 button panel, you will be programming dial out numbers for buttons 3 and 8. For a 4 button panel, the corresponding button locations are 2,3,8 and 9.

Step3: Programming Caller ID access numbers (100 max).

1.Press the CALLER ID button.
2. Simply enter cell phone numbers of visitors whom should have access with caller ID (up to 8 at a time).
3. Press SAVE. Note: iphone users will be taken to their SMS screen to confirm the SMS string (press send).
4. The intercom should reply with an SMS to your phone showing the SMS string and an OK status.

To delete, enter number above and press delete

SMS Programming Method:

Add numbers -
9999#72telephonenumber#72telephonenumber#

Delete specific number –
9999#73telephonenumber#

Delete all –
9999#73*#

Programming Additional Features

The intercom should now be able to call users and have some basic Caller ID access. Now you may wish to program additional features for the client, including keypad codes, dialling times (to avoid voicemail on un-answered calls, auto-trigger times etc.

Mic & SPK Volume

Service Calls (prevent SIM being turned off due to inactivity)

Programmer and user pass codes

Turn on SMS notifications when gates triggered.

Time clock automatic opening and closing times

Turn on Auto-clock sync after power failures

Avoid voicemail picking up un-answered calls

Diagnostics

Default relay pulse times

Program keypad code (some models)

Adjust, add or delete clients on your client list

Turn on do not disturb to disable call button at night

Program proximity cards (model dependant)

Phone screen menu (14:56):

- VOLUME CONTROL
- DIALING TIMES
- SERVICE CALLS
- INFORMATION
- PASS CODES
- RELAY TIMES
- NOTIFICATIONS
- KEYPAD PROGRAMMING
- AUTO RELAY TIMES
- CLIENT INFORMATION
- CLOCK SYNC
- DO NOT DISTURB
- PROX PROGRAMMING

1.Volumes

Adjust speaker and microphone volumes.

Enter required level (1-9) for optimum speech.
TIP: Set as low as possible for good acoustics.
Default = 5

Press SAVE.
TIP: Iphone users will be taken to SMS screen to confirm message. Android devices will automatically send the SMS.

SMS string for Speaker Volume:
9999#3**X**# (X=1-9, default = 5)

SMS string for Microphone Volume:
9999#4**X**# (X=1-9, default = 5)
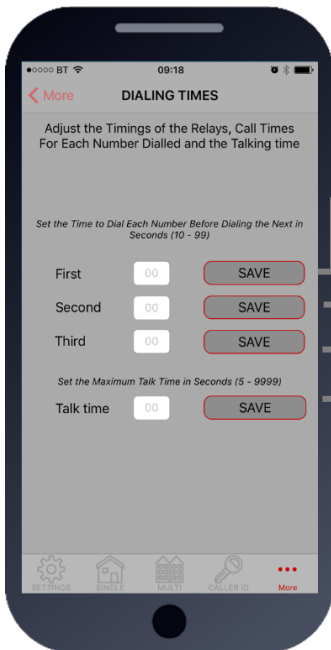

2. Dialling Times & Talk Time

Change ringing times on each number to avoid voicemail picking up a call on un-answered call so the unit can roll over to the next number.
Note: Default 20 secs (includes 5-8 sec connection time).

Dialling time for first number (default 20 secs)

Dialling time for second number (default 20 secs)

Dialling time for third number (default 20 secs)

Set MAX talking time for all numbers (default 60 secs)

SMS strings:

9999#45**XX**# (X=dialling time for first number)
9999#46**XX**# (X=dialling time for second number)
9999#47**XX**# (X=dialling time for third number)
9999#53**XXXX**# (X= talking time in seconds, 9999 max)

3.Service Calls

This feature is normally only used on intercoms which are seldom used and only for SIM cards which are likely to be de-activated by the network due to inactivity. It can be programmed to make a chargeable outgoing call or SMS to a number of your choice using this screen.
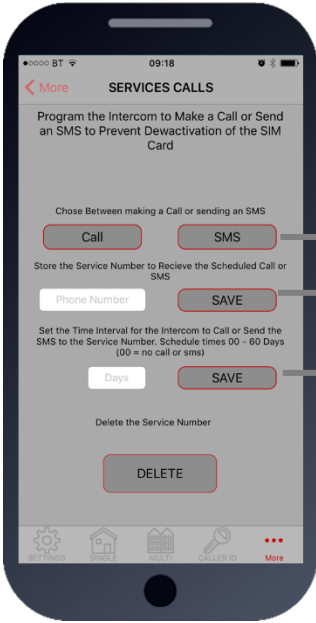

Choose SMS or CALL

Enter the phone number which is to receive the call

Enter the frequency of calls (1-60 days).

TIP: This will call or SMS at the time at which the feature was activated. So, if you set this feature up at 5pm, it will make the service call or SMS at 5pm at the next interval.

SMS string for choosing SMS or CALL:
9999#58X# (For calls, X=2, for SMS, X=1)

SMS string for entering phone number:
9999#77XXXXXXX# (X=cell phone number) 77*# to delete.

SMS string for frequency of calls:
9999#57XX#

4.Info

TIP: Iphone users will be taken to SMS screen to confirm message. Android devices will auto send the SMS.
Check signal strength

Check stored phone numbers

Check stored keypad codes

Check relay status

Check who opened the gate, when it was opened and by what method

ACTIVITY LOG
Use this to see who used the intercom and when. Which pin codes were used, who used caller ID, who answered the call.
TIP: Time and date is in international military format.

Last 6 digits of caller ID user phone number

Last 6 digits of phone number which answered the gate

Last 2 digits of keypad code used

5. Pass Codes

CAUTION: Take care when changing pass codes. There are 2 levels of 4-digit code (both must be different):
1. Engineers/Programmers code (default 9999)
2. Access/user code (default 1234)
You may wish to change both from their defaults for security.

Restore the app to using default codes (does not restore the intercom)

Enter new programmers code (default 9999)

Enter new user/access code (default 1234)

If changing default codes, then you will now need to update the client list before you can do any further programming. **If the 1234 user access code is changed, then you will also need to change it on the home owners app.**

SMS Strings:
9999#01**XXXX**# (X=new programmers code)
9999#02**XXXX**# (X=new user access code)

6.Relay Times

Relay default trigger times are 1 second. Use this feature to change a relay for a longer time perhaps for a magnetic door lock or to make one relay a momentary relay and the other a 1 hour relay for example.
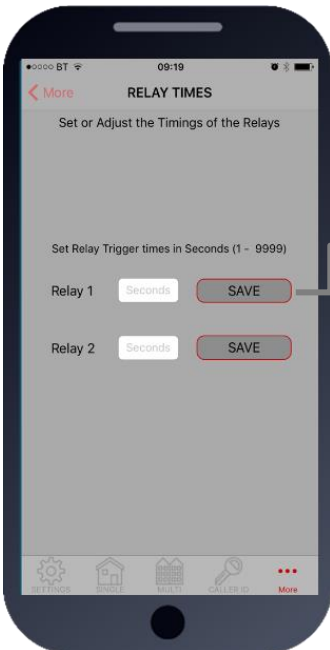

Enter time in SECONDS then press SAVE to send SMS

TIP: Iphone users will be taken to SMS screen to confirm message. Android devices will auto send the SMS.

SMS string for relay 1:
9999#50**XXXX**# (X=time in seconds, 1-9999)

SMS string for relay 2:
9999#51**XXXX**# (X=time in seconds, 1-9999)

7.Notifications

This feature is commonly used to allow one home user to receive SMS alerts each time the INTERCOM is used to trigger the gates and grant access.
Quick Enable / disable this feature

Enter the phone number to receive the SMS alert and press SAVE

Enter text which you want the user to receive when access is granted, then press SAVE MESSAGE

SMS string for turning ON or OFF:
9999#80X# (X=2 to enable. X=1 to disable)

SMS string for entering phone number to receive notification:
9999#78XXXXXXX# (X=cell phone number) 78*# to delete.

SMS string for entering text to display:
9999#79XXXXXXX# (X is any text message you wish to display on the phone. E.g. Gates Opened)

8.Keypad Programming

For Permanent 24/7 Codes

For Time Restricted Codes (codes that work during certain times & days of the week

For temporary codes (codes which auto-expire in a pre-set time)

Keypad Code

Timed Code

Temporary Code

Delete Code

For deleting codes
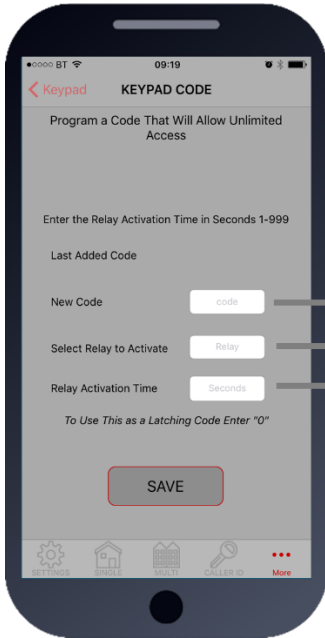

Permanent Keypad Code

Stores up to 200 codes, all of which can be used to gain access 24/7.

Enter 4 digit code

Choose Relay 1 or Relay 2

Enter activation time. (0-9999 seconds)
Use 1 second for gate trigger.
Use approx. 5 secs for magnetic locks.
Use 0 for latching or toggle code.
Use 3600 secs for 1 hour hold open on gates

SMS String for adding keypad codes:

9999#811code#time#

Pass code

Function code

1 = Relay 1
2 = Relay 2

4 digit user code

=SECONDS
1-9999
0 = Latching
Time (Restricted) Code

Stores up to 20 codes which will only work during pre-set times and days of the week. (Relay 1 only).

Enter 4 digit code

Enter Start and Finish time
(Military format without any colons.
E.g. 8am = 0800. 11pm = 2300)

Select days of the week the code is to be active.

SMS String for time restricted code:

9999#83#day,day,day#time1,time2#code#

Pass code

Function code

Select days (up to 7)
3 digit format, separate with commas.
E.g. mon,tue,wed,thu,fri

Enter start and end time in 24hr 4 digit format (no colon), and separate with comma. e.g. 0800,2300

4 digit code
Temporary Code

Stores up to 30 codes at any time which will auto expire after a pre-set countdown time (1-168 hours) (Relay 1 only)

Enter 4 digit code

Enter countdown time in hours (1-168 hrs)

SMS String for temporary code:

9999#82#hours#code#

Pass code

Function code

Can be between 1-168 hours

4 digit code
Delete Codes

You can use these buttons to delete a recently stored temp or time restricted code (codes shown beside the delete button)

Delete any known code

Delete ALL codes

SMS String for deleting a known code:

9999#84code#

Pass code

Function code

Code to be deleted
Deleting ALL codes: 9999#84*#

9. Auto Relay Trigger Times

Create up to 40 automatic time clock events to trigger or latch/unlatch gates (depending on gate system setup).
For auto closing gates, send latch command at the desired opening time, followed by a separate unlatch event to close at the desired closing time.
For step-by-step operated gates (non auto-closing), then send a momentary trigger command at the time required to change the state of the gates from open to closed or closed to open.
1. Pick the type of event (momentary/latch/unlatch)

2. Choose the days

3. Enter the time in military 24hr format without colon E.g. 8.30am = 0830. 11:10pm = 2310.

1234#1#day,day,day#time#

USER passcode

Enter time in 24hr format (no colon)

Select days (up to 7)
3 digit format, separate with commas.
E.g. mon,tue,wed,thu,fri

Command:
1=trigger relay 1
2=latch relay 1
3=unlatch relay 1
4=trigger relay 2
5=latch relay 2
6=unlatch relay 2
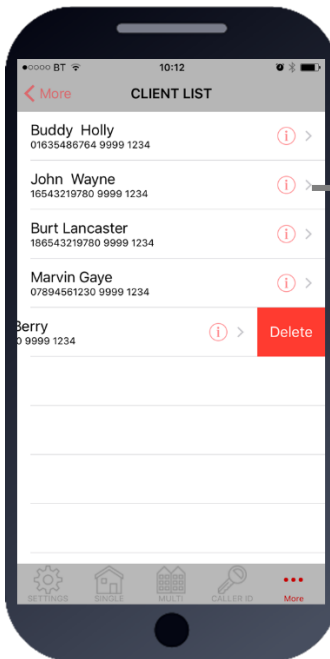

10. Client list on iphone

The client list allows you to save sim phone number, customer name and pass codes for all your installs.

Press to select Client

Swipe to delete
Press to SAVE after editing

Press to load details & program

On any previous install, you can load the customer and then re-program their intercom.

11. Clock Sync

●○○○ BT 🛜   15:52   🔋■▶
❮ More   **CLOCK SYNC**

The Prime Intercom Requires the Internal Clock
to Have the Correct Time and Day Stored

Press to Set the Time on the Intercom

CLOCK SYNC

*When This Feature is Activated, In the Event of a
Power Failure, the Intercom Will Reset the Internal
Clock on Power Up and All Timed Features Will
Function as Normal.*

Time Reset for Winter/Summer Daylight Saving

DAYLIGHT SAVING

The unit has an internal time clock counter, which reads the time from an incoming SMS message, and uses this to calibrate its time clock.

For power failure events, this feature allows the unit to send a SMS to itself after a power failure.

Simply press the button and the app will send a SMS string to the intercom storing the phone number from the SIM card inside memory.

TIP: Use this if your area experiences regular power cuts and your client is using timed features.

Note: Using this feature will cause the unit to be busy for 2-3 minutes after a reboot. Please be patient with programming etc after a re-boot.

9999#86telephonenumber#

Pass code

Function code

Phone number of the SIM card in the intercom
TIP: 9999#86*# will delete this number again

11b. Daylight Saving

For regions where there is a 1 hour time shift for daylight saving, it can be useful to have the intercom send itself a SMS every set number of days to re-synchronise the internal clock. The intercom will do this anyway each time a SMS is received.
Set the number of days between SMS message sending (depending on carrier provider, this may be chargeable to the customer).

9999#87??#

Pass code

Function code

1-99 days
0= no SMS sheduling

12. Do not disturb

This feature allows the push button on the intercom to be active during pre-set times, and ignore button presses all other times.
Use this screen to set the *ACTIVE* times and days for the button.
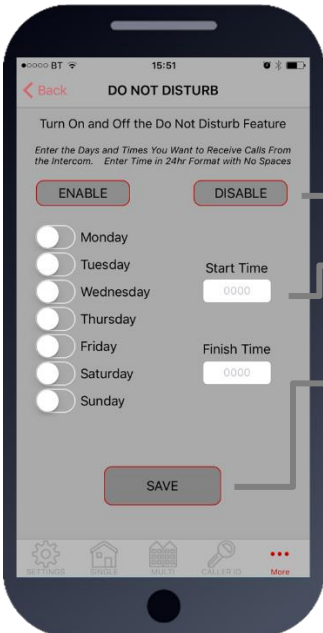

Quick enable/disable button

Select start and finish times for the button to work (24hr format, no spaces or colon. E.g. 8:30am = 0830

Press save to send SMS command.

9999#21#day,day,day#time1,time2#

Pass code

Function code

Select days (up to 7)
3 digit format, separate with commas.
E.g. mon,tue,wed,thu,fri

Enter start and end time in 24hr 4 digit format (no colon), and separate with comma. e.g. 0800,2300

To activate, enter the following code:
1234#21#ON# (change ON to OFF to disable again).

12b. After Hours / Out of Hours

If you have activated the do not disturb feature, the push button will not call anyone after the pre-set time threshold. However, sometimes it is useful to have the intercom call a different number after hours. For example, in commercial premises it can call the office phones during business hours, and then call a security guard after hours.

OUT OF HOURS

Card ID

13d. Deleting cards

This screen allows any known card ID to be deleted (by serial number), and it will also show the last stored cards for each type of card.

Delete Saved Prox Card and Tag ID's
Delete the Last Saved or All Known Codes

Temporary ID
Code [Delete]

Time Restricted Prox ID
Code [Delete]

Enter Known ID
Code [Delete]

Delete All Stored Codes
[Delete All]
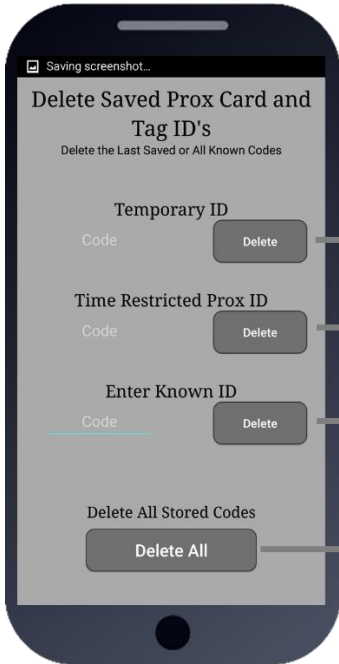

Delete the last stored temporary card.

Delete the last stored time restricted card.

Delete any known card ID.

Delete ALL stored cards.

SMS String for deleting a known code:

9999#64cardID#

Pass code

Function code

Card ID to be deleted

Deleting ALL codes: 9999#64*#

Complete list of parameters

The table below show the complete list of features.

Changing pass codes

9999#01????#	Change programming password	9999
9999#02????#	Change access control password (SMS control of relays, or non-stored numbers can call intercom & enter code to activate output 1).	1234
9999#03????#	Change monitoring mode password (user can call the intercom, enter this pass code to listen in and speak)	5555

Dial out numbers

9999#1XY????#	Store dialling out numbers. (X = button number 1-9 & 0 for button 10) (Y = number dialled 1-4) (???? = phone number)	N/A
9999#1XY*#	Delete a dial out number. (X = button number) (Y = number position 1-4)	N/A

Volume controls

9999#3?#	Speaker volume. Where ? = 1-9. 1 = lowest, 9 = highest.	5
9999#4?#	Microphone volume. Where ? = 1-9. 1 = lowest, 9 = highest.	5

Timings

9999#50?#	Relay 1 time. ? = seconds, 1-9999	1 sec
9999#51?#	Relay 2 time. ? = seconds, 1-9999.	1 sec
9999#45??#	Calling time for first number, adjust this to avoid voicemail picking up a call (10-99 secs)	20 secs
9999#46??#	Calling time for second number, adjust this to avoid voicemail picking up a call (10-99 secs)	20 secs
9999#47??#	Calling time for third number, adjust this to avoid voicemail picking up a call (10-99 secs)	20 secs
9999#53????#	Talking time. 5-9999 seconds.	60 secs
9999#55??#	Max monitoring time (for listen in mode when calling the intercom) 00-60 mins. 00 = no limit.	10 mins

Scheduled service calls

9999# 77number#	Store a service number to receive a scheduled call or SMS from the unit. Useful for SIM cards which are not often used to prevent switch off by the network provider.	N/A
9999#57??#	Set the time schedule for the intercom to make a scheduled call or SMS to the service number. 00-60 day time schedule. 00 = no call or SMS.	00
9999#58?#	Choose between making a scheduled call or scheduled SMS. 1 = SMS. 2 = call.	1
9999#77*#	Delete the stored service number	N/A

Caller ID features

9999# 72number#	Store caller ID number. Max 14 digits. Only last 6 digits compared.	N/A
9999# 73number#	Delete caller ID number.	N/A

9999#73*#	Delete all caller ID numbers	N/A

Service & diagnostic messages (no passcode required for some of these!)

*20#	Check reception level 1-31 (no passcode needed)	N/A
*21#	Check stored numbers. O = dial out number. I = dial in number. E = end of message. (no passcode needed)	N/A
*22#	Check input status and relay status. (No passcode needed)	N/A
*23#	Sends SMS messages of the last 20 events.	N/A
1234#25#	Check stored keypad codes.	N/A

Keypad Programming

9999# 81Xcode#time#	**Permanent codes** - X=1 or 2 for relay 1 or 2. Code = 4-6 digits. Time = 1-9999 seconds, or 0 for latching code.	N/A
9999# 83#day,day,day #time1,time2# code#	**Time restricted codes** Day = day of the week e.g. mon,tue,wed,thur,fri. Time1 = start time. Time2 = end time (24 hr format, no colon. E.g. 11:30pm = 2330. 8.30am = 0830. Code = pin code 4-6 digits.	N/A
9999# 82#hours# code#	**Temporary codes** Hours = time to expire in hours (1-168 hours). Code = Pin code 4-6 digit code.	N/A
9999#84code#	**Delete code** – Code=known code to be deleted.	N/A
9999#84*#	Delete all codes.	N/A

Prox Card/Tag Programming

9999# 61Xcode#time#	**Permanent codes** - X=1 or 2 for relay 1 or 2. Code = 4-6 digits. Time = 1-9999 seconds, or 0 for latching code.	N/A
9999# 63#day,day,day #time1,time2# code#	**Time restricted codes** Day = day of the week e.g. mon,tue,wed,thur,fri. Time1 = start time. Time2 = end time (24 hr format, no colon. E.g. 11:30pm = 2330. 8.30am = 0830. Code = pin code 4-6 digits.	N/A
9999# 62#hours# code#	**Temporary codes** Hours = time to expire in hours (1-168 hours). Code = Pin code 4-6 digit code.	N/A
9999#64code#	**Delete code** – Code=known code to be deleted.	N/A
9999#64*#	Delete all codes.	N/A

Notifications

9999#80X#	X=1 to disable. X=2 to enable.	N/A
9999#78XXX#	X=phone number to send notifications to. (*=delete number)	N/A
9999#79text#	X=text to send to the receiving phone e.g. "gate opened"	N/A

Automatic Time Clock Trigger Times

1234#X# day,day,day# time#	X=1,2.3 (trigger, latch, unlatch relay 1) 4,5,6 (relay 2) Day = days of the week (mon,tue,wed,thur,fri,sat,sun) Time = time of day (24 hr format, no colon. E.g. 8:30am = 0830)	N/A
1234*X#	Delete ALL automatic trigger times.	N/A

Clock Sync - Auto Time Calibration after Power Fail

9999#86XXX#	X=telephone number of SIM inside the intercom.	N/A
9999#86*#	Delete the phone number.	N/A

Summer Daylight Auto Correct

9999#87??#	?? = number of days between SMS calibration SMS should be sent. 0 = no message sending.	N/A

Do Not Disturb (push button de-activated during set times)

1234#21#ON#	ON = activated. OFF = de-activated.	OFF
9999# 21#day,day,day #time1,time2#	Enter all active days during which button should operate. Enter start and end time button should operate (24 hr format, no colon. E.G 8:30am = 0830)	N/A

Alternate Number to Call During Do Not Disturb Times.

9999# 21X????#	X = button number (1-9. Enter 1 for 1 button system. Enter 0 for button 10) ???? = Alternative phone number to call out of hours.	

Restore Defaults

9999#999#	Send with passcode string to clear all programming.	N/A

Troubleshooting

Please see faults in order of most common…

1: Not detecting network (blue light flashing 5 times in search mode, no green CPU light).
A: SIM card not detected. Power off, remove, clean sim contacts and re-insert and power on again.
A: SIM card inserted wrong way round. Check manual for correct orientation.
A: SIM is a data sim, or has not been activated.
A: SIM has no signal in the area.
A: Antenna not connected.
A: Too many sharp bends on antenna cable.
A: Antenna mounted too low or inside metal enclosure.
A: Power cable from 24v psu is too long or too thin. Refer to manual for guidelines.

2: Not responding to SMS messages and not making outgoing calls.
A: No credit on SIM card.
A: Power cable not within spec. Refer to manual for guidelines.

3: Not triggering gates or lock when activated from phone.
A: Check relay with multi-meter.
A: Check relay 2 with multi-meter. If relay 2 works but relay 1 does not, then relay 1 may be defective.
A: Check power cable is within specifications according to this manual.
A: Check if it works by SMS. Try latching a relay then use the status button to check if the relay is latched. If that works, problem could be the phone being used, or low signal strength at the intercom.

3: Poor sound or buzzing
A: Ensure there is no spare antenna cable inside the call point with the intercom. Straighten excess cable.
A: Install the antenna further away from the intercom.
A: Check the power cable is within guidelines of this manual.

4: Home owner app not working correctly
A: Check the settings on the app has the intercom SIM number and pass codes entered correctly.

Change History

Key:
P = Panel version   H = Hardware PCB version   S = Software version

Version			Reason for change
P	H	S	
1	1	1	First version.
1	2	1	Power chip upgraded to work on 24v dc (24v adaptor in kits).
1	2	2	Software feature added for call log to show last 25 caller ID calls.
1	3	2	Main capacitor, regulator & diode upgraded for 24v ac.
1	4	2	Micro Sim Holder and complete board respin
1	4	3	Caller ID fix for international + symbol. (October 2016)
1	5	4	PRIME model, new firmware plus larger flash storage. (November 2016)
1	6	4	SMA connection directly on the board, micro sim and 24v PSU (July 2017)
		Prime6 begins here	
1	1	1	-First version, with slave keypad connections. -Prox option. -Architectural panels have call button in centre.

EU-RED Declaration of Conformity

Manufacturer: Advanced Electronic Solutions Global Ltd
Address: Unit 4C, Kilcronagh Business Park, Cookstown, Co Tyrone, BT809HJ, United Kingdom

We/I declare, that the following equipment (GSM Cellular Intercom System), part numbers:
Multiple Model kit part numbers: GSM-5AB, GSM-5ABK, GSM-5HB, GSM-5HBK, GSM-5IMP, GSM-5IMPK, GSM-FB, GSM-5FBK.

Complies with the following essential requirements for 2014/53/EU:

ETSI draft EN 301 489-1 V2.1.1 (2017-02) (Electromagnetic compatibility)
ETSI draft EN 301 489-52 (2016-11) (Electromagnetic compatibility, specific to cellular)
(WCDMA Band 1, Band 8, GSM 900 / 1800).
Test report number LCS170721023AE

ETSI EN 301 511 V12.5.1 (2017-03) (3.2 of directive 2014/53/EU)
ETSI TS 151 010-1 V12.8.0 (2016-05) (Digital cellular telecoms compliance)
Test report number LCS170721025AE

ETSI EN 301 908-1 V11.1.1 (2016-07) (IMT Cellular networks, 3.2 of directive 2014/53/EU)
ETSI EN 301 908-2 V11.1.1 (2016-07) (CDMA spread / UTRA FDD)
Test report number LCS170721026AE

EN 62311 :2008 (Electromagnetic safety and human exposure)
Test report number: LCS170721027AE

EN 60950-1, (A1, A11, A12, A2)
EN 62311

CE

0560

The notified body is: Telefication BV (CAB number 0560).
This declaration is issued under the sole responsibility of the manufacturer.
