

Dear valued business partner,

with this letter we would like to inform you about a change concerning our KS4-PRO assembly accessories. From July 03rd 2023 we will start to deliver the resistor plugs as well as the plugs with connection cable in red colour. The red plugs replace the previous black plugs and offer advantages in the visual control of the assembly due to the colour contrast to the contact profile and the sealing compound. As neither the geometry of the connectors nor the material used are affected by the adaptation, all product characteristics remain unchanged. Likewise, all previous article numbers of the KS4-PRO assembly accessories remain valid.

Please note that the changeover will be done successively. Existing stocks will still be used and consumed. Of course, the plugs are also compatible with each other, i.e. the combination of a black and red plug (since it is covered by the end caps anyway) is also possible.

If you have any questions about this product adaptation, please do not hesitate to contact us.

Best Regards,

*Your ASO Safety Solutions Team*
