# INSTRUCTIONS AND ASSEMBLY OF HF DIP SWITCH PROGRAMMER

INTRAT⦿NE

**Reference
12-0122-EN**

PRODUCT PRESENTATION

The HF DIP SWITCH PROGRAMMER is a device used to quickly programme DIP SWITCH codes for one or more remote controls. The concept is simple: you toggle the HF DIP SWITCH PROGRAMMER switches to create a DIP SWITCH code that will be written to remote control(s) that you wish to program. The DIP SWITCH code for your remote controls will then be saved by your receiver when in detection mode.

Some important points to remember:

- The HF DIP SWITCH PROGRAMMER is a device used to independently program one or more remote controls.
- The HF DIP SWITCH PROGRAMMER's "Copy" mode provides on the fly copies of as many remote controls as you desire.
- The HF DIP SWITCH PROGRAMMER is compatible with **07-0106-EN** (EEN-REC4) receivers.
- The HF DIP SWITCH PROGRAMMER includes a selection of 1022 different DIP SWITCH codes for use with your remote controls.
- The HF DIP SWITCH PROGRAMMER runs on two CR2032 batteries, available in stores.

FEATURES

1) WRITE

1	2	3	4
Set switches	Turn on the DIP SWITCH programmer	Set the remote control on the DIP SWITCH programmer	Confirm programming
Example **ON** 0 1 0 0 1 1 0 0 1 0			1 🔊 + 1 ☀ settings

2) DELETE

1	2	3	4
Set all switches to ON	Turn on the DIP SWITCH programmer	Set the remote control on the DIP SWITCH programmer	Confirmation delete
ON			1 🔊 + 1 ☀ settings

3) READ

1	2	3	4
Set all switches to OFF	Turn on the DIP SWITCH programmer	Set the remote control on the DIP SWITCH programmer	The LEDs show the DIP SWITCH code programmed earlier
ON			○●○○●●○○●○ 0 1 0 0 1 1 0 0 1 0

4) COPY

1	2	3	4
Start programmer in **"READ"** (the copied code is displayed)	Press and hold the DIP SWITCH programmer power button for 3 seconds	3 beeps confirm launch of **"COPY"** mode	One by one, set your remote controls on the DIP SWITCH programmer
READ mode DIP SWITCH code to copy	**3 sec**	**COPY mode**	

5) TURN OFF DEVICE

There are three ways to turn off the device			Confirm power off
Press power on button	Toggle switch	Automatically powers down after 10 seconds without use	
	ON	**10 sec**	🔊 🔊 🔊

CHANGING BATTERIES

1) WHEN SHOULD I CHANGE THE BATTERIES?

Battery level

1

Press power on button
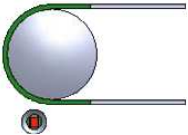

2

The settings LEDs flash and show the battery charge levels

FLASH

●●●●●●●○○○

●●○○○○○○○○

Changing batteries

NO

NEW BATTERIES NEEDED

2) HOW DO I CHANGE THE BATTERIES?

The following diagram shows you how to change the batteries. **CR2032** batteries are available in most stores.

Make sure that the batteries are positioned correctly as shown.
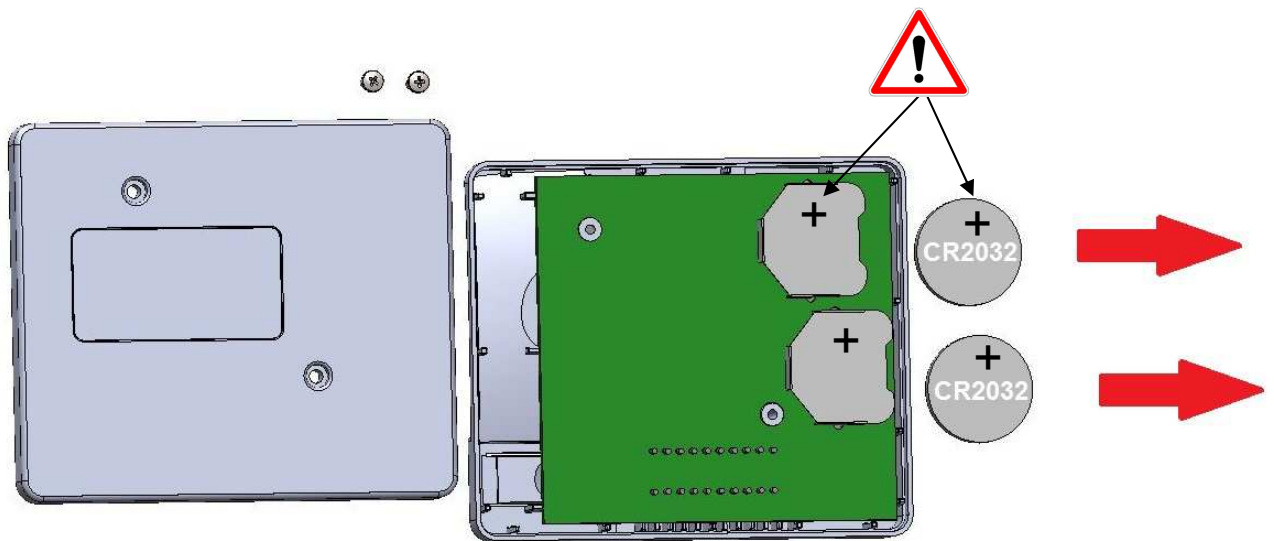

When removing the batteries, take care not to damage the electronic circuit that houses them, especially if using a screwdriver.
The warranty is void if damaged.
