CREATE THE PERFECT LOOK FOR YOUR HOME WITH THE STARGATE RANGE OF ALUMINIUM GATES

WHY CHOOSE STARGATES?

Stargates has been selling gates in the UK for over 20 years and is now the largest supplier of aluminium gates in the country.

We have our own facility in the UK and stock, remodel and repair aluminium gates on-site. Over the years, we've developed a wealth of expertise and have supplied gates to hundreds of happy customers.

Every single gate that leaves our site is carefully inspected by a member of our expert team to make sure it meets our high standards. This ensures the gates our customers receive are in pristine condition and are ready to be installed, automated and used straight away.

With over two decades of experience, a fantastic range of high quality gates and a commitment to customer satisfaction, Stargates is the perfect choice for your gate installation. Give us a call on **033 022 34800** to find out more and make your gate the star of your home.

WHY CHOOSE ALUMINIUM?

Strong, durable and stylish, aluminium gates can withstand the worst the British weather can throw at them. The perfect way to enhance curb appeal and transform the look of your driveway, aluminium gates will make the ideal addition to your home.

Unlike wooden gates, aluminium won't warp, bend or split over time. Easy to maintain and offering a great choice of finishes, aluminium gives you all the benefits of wood without the maintenance.

If you love the look of timber but don't want to see your gates slowly succumb to wet rot or green algae, opt for a wood finish for your aluminium gates. Combining the natural beauty of wood with the strength and durability of aluminium, wood effect gates are the perfect choice for your home.

Thanks to recent advances in manufacturing, wood effect aluminium gates are now more affordable, more hard-wearing and more realistic than ever. Almost indistinguishable from natural timber, wood effect aluminium gates can give you the look and the durability you need for your home.

KEY BENEFITS OF ALUMINIUM GATES:

Strength - Thanks to their modular extrusion construction, aluminium gates are both incredibly strong and incredibly light. This construction is guaranteed for five years.

Durability - Their tough coating protects aluminium gates from the elements and prevents the finish from fading over time. This protective layer is guaranteed for ten years.

Versatility - Aluminium gates can be finished in a wide range of textures and colours including realistic wood effect.

Low maintenance - Aluminium gates require virtually no maintenance and will stay looking pristine for years.

CLASSIC

Reinforced cross rail
for motorization

Filling Materials
Full-fill &
Semi-openwork:

The modern design and use of decorative elements make the Actuel range the most contemporary within Stargates portfolio. In this range you will find models composed of decorative aluminium sheets, sand blasted glass and different sized blades and tubes all contributing to a very high-end look. This range also offers ventilated tubes and corrugated / thorned blades with a very attractive design. **Please contact us for the full range of customisation options.**
