

How to program a new TX4UNIS remote into an LM600, 800, 1000-433 garage door opener.

1. Take the new TX4UNIS remote and slide the cover down to expose the four buttons. Press and hold the left and right hand buttons together and the white LED is flashing. Keep holding until the LED stays on constant and then let go. Now press the top button on the remote once and the LED flashes, press it a second time and the LED flashes again, press it a third time and the LED flashes again and now let go. Now press the bottom button once and the LED goes out.

2. Locate the blue Learn button on the back panel of the opener. Press the LEARN button once and the Yellow LED comes on.

3. Press & hold your chosen button on the remote control, for 3 seconds, and the LEDs light will flash. Now let go of the remote control button, LED goes out, and the remote is ready to use.

To delete all remote control codes. Press & hold the blue LEARN button until the Yellow LED goes out, then let go. (Approximately 9 seconds).
